

# COCONUT OIL WARMING SOLUTIONS

## WITH POWERBLANKET

UNLIKE CONVENTIONAL INSULATED BLANKETS AND BAND HEATERS, POWERBLANKETS HAVE THE BEST HEAT DISTRIBUTION SOLUTIONS FOR DRUM AND BUCKET HEATING. HEAT EVENLY AND MAINTAIN OPTIMAL VISCOSITY AND FLOW, WHILE AVOIDING BURNING AND SCORCHING.

### BODYTECH COSMETICS

Different jobs come in different sizes, and Powerblanket serves them all. Some jobs are as simple as heating up a 5-gallon bucket or one 50 gallon drum, and they're just as important. So when Dan McFarland at BodyTech Cosmetics needed a solution to a freezing problem, he turned to those who do it best.

BodyTech Cosmetics, which manufactures handmade skin care products, realized it had a need for Powerblanket's Heaters to help maintain temperatures for a key product ingredient.

By keeping our coconut oil melted in the container, it saves having to use a microwave or other inefficient means of melting it.

DAN MCFARLAND | BODYTECH COSMETICS

"We use a lot of coconut oil," McFarland said, adding that he usually used a microwave or other methods to warm up his oil. At times, McFarland said he had to get creative. "For a couple of years I had been using an aquarium heater to melt the oil," he said.

### TURNING TO POWERBLANKET

While points are given for innovation, McFarland realized that he needed a solution that was tailor-made to heat up the coconut oil. That's when he discovered Powerblanket's drum and bucket heaters, which he says completely changed the game. Unlike microwaves or aquarium heaters Powerblanket has a solution to regulate even heating without having to take the coconut oil out of the container.

"By keeping out coconut oil melted in the container it saves having to use a microwave or other inefficient means of melting it," he said. Coconut oil has long been used for the skin and in many beauty

POWERBLANKET PROVIDES THE MOST INNOVATIVE HEATING SOLUTIONS ON THE MARKET, DELIVERING SAFE UNIFORM HEAT.

products because of its naturally antibacterial and anti-fungal properties. It's an excellent moisturizer and penetrates the hair better than other oils. Using coconut oil in cosmetics involves keeping it at a stable temperature for use, which can be very difficult if not using the best equipment.

Powerblanket's drum and bucket heaters are an time-saving and dependable warming solution. Just like BodyTech Cosmetic's products, each heater is handcrafted and can quickly heat to a maximum temperature of 145°F. The insulated full-wrap design evenly heats material to a steady temperature. It also meets UL and CSA safety standards.

## WE KNOW WARMING

No matter how small the job, Powerblanket's bucket and drum heaters makes a big impact for businesses like BodyTech Cosmetic. For more information, contact a Powerblanket representative today!

COCONUT OIL IS BEST HEATED SLOWLY, AS OPPOSED TO USING OTHER SOURCES SUCH AS A MICROWAVE.
