

Solid Step Cote for Kitchens

Recommended Formulation: 02 or 03

Residential and Commercial kitchens are one of the most common places where slip and fall accidents occur. Applying a non skid coating to the kitchen floor is so important for the safety of your family or staff. No matter how careful one is, food, liquids, oils and other substances will find their way onto the kitchen floor, creating a safety hazard that you often cannot see. With **Solid Step Cote**, your kitchen floor will prevent accidents even under the most slippery conditions as it features a polymer aggregate that creates an invisible, textured surface above the floor that grips the feet even when wet or oily.

Solid Step Cote is unique among non slip solutions in that it bonds with **ANY** flooring surface. It is also the only single component, crystal clear, Green solution on the market, making it a perfect fit for kitchens or food preparation areas. It is completely safe and so easy to apply. Unlike most other non slip products, **Solid Step Cote** is the environmentally friendly no-slip solution as it has no toxins, fumes or odors and can be washed right down the drain.

Just roll it on, allow it to dry for several hours, and your kitchen will be a safe, no skid zone for years. **Solid Step Cote** will maintain your kitchen floor's great looks and will not discolor, crack or peel over time. **Solid Step Cote** is also a sealer with built in mildewcides. It will protect your flooring surface from wearing down while sealing grout lines, keeping them looking like new and free of grime, mold and mildew. And cleaning your **Solid Step Cote** floor is so easy. Just mop or brush with water and a mild detergent, that's it!

Create a non toxic, non slip floor today with **Solid Step Cote**. Its the smart choice for preventing slip and falls in any kitchen.
