

GAS CYLINDER HEATERS

Powerblanket has the best gas cylinder heaters on the market. Our heating blankets will overcome the effects of cold weather and maintain pressure and efficiency on any gas cylinder.

WANT GREATER PEACE OF MIND?
Try Powerblanket with Beacon Controllers

A large US railroad company uses these heaters to keep snow off the tracks. By applying the Powerblanket Gas Cylinder Warmers to their 1000 lb propane tanks, they can power their generators along the railway system. Before using the Powerblanket heaters, the cold temperatures kept the propane from vaporizing, which meant there was not enough pressure in the tank to run the generators.

WHY CHOOSE POWERBLANKET?

- Increase performance and efficiency of gas cylinders
- Save money by optimizing gas and material usage
- Eliminate unnecessary cylinder refills in cold weather
- Insulated full-wrap design
- UL/CSA safety certifications

If you have a home, cabin, or business fueled by propane, you know how frustrating and expensive it can be when your propane pressure decreases in cold weather. No one wants the burden of having to constantly fill a tank in order to run your house, cabin, or business. If you have the right tools, you can enjoy propane efficiency year-round and avoid the pain of frequent refills. Powerblanket gas cylinder heaters will improve efficiency when temperatures decrease.

GAS MILEAGE

Propane tanks supply the best output when warm, whether it is the ambient temperature that is keeping your tank warm, or an external heat source. Gas volume is determined by the number of molecule collisions occurring within the container, and these collisions increase as the temperature increases. Powerblanket gas cylinder heaters afford you increased propane flow and insulation. Powerblanket gas cylinder heaters will improve propane tank efficiency. Increase your gas mileage with Powerblanket.
