

Solid Step Cote DIY Tub and Shower Kit

Solid Step Cote applies easily to a clear and virtually invisible finish and works on all tubs and showers including *porcelain, acrylic, fiberglass, cast iron, ceramic and decorative tile.*

Featuring Solid Step Cote 03 formula, this is a perfect solution for those that require a slightly rougher texture than Solid Step Cote 02 and who shower primarily as opposed to bathing.

Preparation:

The surface should be completely dry and free of dirt, debris and oil or grease prior to application. Thoroughly clean the surface to be coated with water and a standard cleaner to remove dirt, dust and stains. Dry surface before applying product.

Application:

- 1) Clean tub or shower surface thoroughly, making sure to remove any dirt or other contaminants.
- 2) Lightly shake contents of bottle.
- 3) Pour 1-2 oz. of product into provided paint tray. Swirl occasionally to mix aggregate.
- 4) Roll on to tub or shower surface gently and evenly with the provided roller (product is self-leveling).

**If applying two coats for greater durability and lifespan, allow 1st coat to dry to touch (15-20 minutes) before applying 2nd coat.*

- 5) Allow 3 hours drying time (at 75F and 50% relative humidity) before showering, 24 hours before bathing.

Do not apply at temperatures below 50° F or above 90° F.

Cleaning:

Clean your **Solid Step Cote** treated floor, tub or other surface as needed with a mop, sponge or nylon bristled brush using water and any liquid household tub or shower cleaner.

DO NOT clean **Solid Step Cote** treated surfaces with highly abrasive tools such as *Scouring Pads* or *Abrasive Sponges*. Abrasion will damage the surface of the coating, removing the non-slip textured aggregate and damaging the surface appearance. **DO NOT** use *Chemical Solvents* to clean as they may dissolve the coating.

Coverage:

One 4 oz. kit will treat 1 standard sized tub, one 8 oz. kit treats 2 standard tubs or 1 large walk-in shower with a 2-coat application. For most tubs and showers 2 oz. will provide a single coating over 6 square feet. With proper care and a 2-coat application, the SolidStepCote treated tub should last for 3-5 years before needing reapplication.
